KENN ERROLLE SANTOS

BUSINESS INTELLIGENCE ANALYST | POWER BI DEVELOPER | DATA AUTOMATION

Muntinlupa City, Metro Manila, Philippines | 0921 530 4886 | kennsantos263@gmail.com | www.linkedin.com/in/kenn-errolle-santos-09750433a

PROFESSIONAL SUMMARY

Business Intelligence and Reporting Analyst with 8+ years of experience across business operations, invoice auditing, reporting, and analytics, including 4+ years focused on BI reporting and dashboard development. Experienced in building and maintaining Power BI dashboards, developing DAX measures, transforming data with Power Query, and combining data from multiple sources to deliver accurate operational and executive reporting. Hands-on experience with SQL, Excel, Salesforce, SharePoint, Power Apps, Power Automate, and SAP Analytics Cloud. Uses generative AI tools including Claude, ChatGPT, and Microsoft Copilot to support research, problem-solving, and productivity.

CORE SKILLS

Business Intelligence & Analytics: Power BI, DAX, Power Query, SQL, Tableau, data modeling

Workflow Automation & App Development: Microsoft Power Automate, Power Apps, SharePoint

CRM & Business Platforms: Salesforce

Generative AI & AI-assisted Productivity: Claude, ChatGPT, Microsoft Copilot, Claude Cowork

Data Operations: ETL concepts, data transformation, validation, reconciliation, operational and executive reporting

Microsoft Excel: Advanced Excel, reporting, data analysis

PROFESSIONAL EXPERIENCE

GO TEAM | Business Intelligence & Reporting Analyst | *2026–Present*

- Develop and maintain Power BI dashboards and automated reports to support business performance monitoring and management decision-making.
- Work with stakeholders to understand reporting requirements and translate business needs into actionable reporting outputs.
- Combine and validate data from multiple sources to maintain reporting accuracy, consistency, and integrity.
- Identify opportunities to improve reporting workflows through automation and process optimization.

SAP CONCUR | Reporting Analyst | *2022–2026*

- Developed and maintained operational, productivity, quality, and performance reports using Power BI and Microsoft Excel for management and executive stakeholders.
- Maintained dashboards and reporting solutions covering Productivity, Scorecard, CSAT/NPS, Invoice Capture, Expense Audit, Detect Productivity, Audit Master, Lost Hours, and partner reporting.
- Created and maintained DAX measures, report logic, data transformations, and dashboard views to support performance tracking across multiple lines of business and global sites.
- Validated and reconciled data from multiple sources to improve the accuracy and reliability of daily, monthly, and executive-level reporting.
- Supported reporting for Invoice Capture and Expense Audit processes, accounting for differences in source-data refresh and reporting timelines.
- Built a Power Apps gallery and data table connected to a SharePoint list for exception tracking, with Power Automate used to support workflow automation.
- Partnered with business users to clarify requirements, troubleshoot reporting issues, and maintain dashboards originally developed by other team members.

SAP CONCUR | Invoice Capture Specialist – Auditor | *2017–2022*

- Reviewed and audited vendor invoices to verify accuracy and compliance with client-specific guidelines and processing requirements.
- Performed invoice data validation and quality checks, identifying discrepancies and recurring processing errors.
- Maintained productivity and quality logs to monitor operational performance and support reporting requirements.
- Recommended process and quality improvements to reduce recurring errors and strengthen operational consistency.
